Battery terminal grease

Highly adhesive, water-resistant paste provides long-term protection from oxidation for terminals and battery terminals.

Fields of application:

Primarily provides protection from contact wear and corrosion for contact materials containing copper in rail vehicles, construction machinery and shipping applications.

Properties:

- Easy to transport
- Water-repellent
- Operating temperature -30°C to +60°C

Use:

Clean the battery terminal thoroughly by mechanical means. Then apply and spread the battery terminal grease.

Technical data:

Contents	100 ml
Colour	Red
Smell/fragrance	Hydrocarbon
Shelf life from production	36 months
Density	0.93 g/cm ³
Density conditions	At 20°C
Min. temperature conditions	-30°C
Max. temperature conditions	85°C

We provide this information to advise you to the best of our knowledge based on our tests and experience. However, due to the large number of applications and the storage and handling conditions that lie outside the scope of our influence, we assume no liability for the application results in individual cases.

This also applies to the use of the non-binding technical and commercial customer services provided by us. We always recommend that you conduct your own tests. We guarantee the consistent quality of our products. We reserve the right to make technical changes and to further develop our products.
